

Splash Back wall guard with evapor8 Technology

Anti-microbial
Anti-mildew
Highly absorbent
2-year warranty

These backboards are ideal for protecting your walls from water that can get blown off the hands of any "hands under" hand dryer. Made from a unique mix of naturally occurring rock sediment the product is highly absorbent due to its complex, porous structure. The water quickly evaporates leaving the backboard completely dry in seconds, avoiding drips running down to the floor and leaving no watermarks. The backboard is a durable and circular product, which can be ground into a powder and reused to help plants preserve water in dry soil. Easy to screw to any wall via 4 predrilled screw holes.

Application

Splashback wall guards are ideal in all public toilet facilities to protect walls and floors from water and improve hygiene. Robust and durable, minimal maintenance requirement and easy to clean.

References

Public toilets on motorways, in hotels, restaurants, holiday resorts, shopping centres, schools, and institutions.

Technical data

	DAN DRYER
	Product No.: 4500, 4505
Type	Splash back wall guard
Dimensions	H 800 x W 400 x D 8 mm
Material	Rock sediment
Net weight	3.15 kg

Finish

Prod. No. 4500 = grey
Prod. No. 4505 = grey marble effect

Installation

Wall-mounted.

Tender text

Splash back with evapor8 technology protects walls from water splashback. The composite material works perfectly to absorb and evaporate water. Anti-microbial and anti-mildew ensures the board remains hygienic and bacteria free.

Net weight: 3.15 kg. H: 800 mm, W: 400 mm, D: 8 mm
