info@hygiene-shop.eu - www.hygiene-shop.eu

## OPEN UP NEW HORIZONS

EXOS. the new Franke system line, opens up new horizons with its accessories and washbasins for public and semi-public areas.

One line. One system.

One consistent design language, clear-cut shapes, a high quality standard, modular options for customised solutions. Sustainability is the key concept here.

EXOS. by Franke.

One line. One design.

Functionality in perfect harmony.

EXOS. accessories and washbasins combined with PROTRONIC-S electronic taps

## EXOS. ONE LINE

EXOS. by Franke for public and semi-public areas represents the future. For a system that opens up new horizons and combines worlds. The world of accessories and the world of washbasins. The world of functionality and design. For wheelchair accessible, customised areas. Straight lines, sophisticated, timeless. Perfect for every room. Personalised. A perfectly designed system.

EXOS. by Franke.  
Perfectly designed architecture in evidence.  
Highest quality. Tangible throughout the line.

### Consistent design language

The line can be harmonically integrated into any new or existing architectural setting due to its clear-cut, consistent, timeless, elegant design and material.

EXOS. by Franke represents harmony.  
Distinctive throughout the line.

### Modular functionality

EXOS. accessories and washbasins guarantee optimum design flexibility for architecture and planning. The line is suitable for individual, customised solutions for new or existing public or semi-public areas.

All EXOS. products are modular in design and the system will be constantly expandable and upgradeable: The front panels of the accessories are exchangeable and the operation of the soap dispenser can be changed. The bowls and the length of the washbasins can be selected. Thus the whole line represents a comprehensive range that guarantees maximum reliability and planning flexibility and the highest quality modular range of features.

EXOS. by Franke - there's method in it.  
Perfect solutions throughout the line.

### Exceptional quality

Well established materials, such as stainless steel, glass and mineral granite are used for EXOS. All EXOS. system components are high quality, easy to clean and durable.

The whole line - from the use of different materials up to modular washbasin designs - takes modern requirements into consideration.

EXOS. by Franke is quality.  
Tangible throughout the line.

## EXOS. ACCESSORIES

EXOS. accessories by Franke – functionality and performance. Interchangeable fronts made of high quality materials, such as stainless steel and glass, are beautifully designed and can be incorporated individually in any architectural setting. Clear-cut lines. Sophisticated shapes. The timeless design makes for harmonious proportions.

EXOS. accessories by Franke.  
Features and design in harmony.

### EXOS. accessories

With EXOS. accessories, Franke is setting a new direction: Clear-cut design, modular systems and high quality materials.

By the use of interchangeable fronts in different sorts of materials, such as stainless steel and glass, different room ambiances can be created. Flexibility can also be found in the soap dispenser product group. Here the inner operation can be easily changed from electronic to manual, from liquid soap to foam soap. This is possible at any time, even retrospectively.

EXOS. offers modular flexibility.  
Throughout the range.

top left: EXOS. Hand towel roll dispenser with stainless steel front and InoxPlus coating  
bottom left: EXOS. Electronic soap dispenser with white glass front

## EXOS. WASHBASINS

With EXOS. washbasins, Franke has created a unique, perfectly designed system line. With an uniform design language for the whole EXOS. washbasin range. For both standard and also customised solutions.

EXOS. washbasins by Franke.  
For a perfectly designed system application.

### EXOS. washbasins

EXOS. mineral granite washbasins stand out because of their universal flexibility and their modular system. High quality and distinctive design as well as tailor made functionality can be experienced. The use of high quality stainless steel waste covers underlines once more the harmony of the system line.

EXOS. washbasins are excellent for any type of solution in standard areas, wheelchair accessible and customised washrooms. The selection ranges from common standard sizes up to variable dimensions. The range also stands out because of its different bowl sizes, washbasin lengths and integrated additional fitting options.

Increased comfort, safety and ergonomics were taken into account in the design, the dimensions of the worktops, the design of the integrated grab rails and the deliberate separation of wet and dry areas.

EXOS. offers modular flexibility.  
Throughout the range.

## EXOS. MATERIAL

Franke's modular EXOS. system with its range of high quality materials is perfect for any situation. Customised. Modular. In existing or new architectural settings.

EXOS. and its materials.  
Sophisticated, high quality, robust, modern, easy to clean and hygienic.  
Everything well thought out. In one design line.

### Stainless steel

The use of stainless steel as a basic material for equipment in public and semi-public washrooms is standard, for good reason. This well established material combines a stylish appearance with functionality and durability. It can be perfectly combined and can be harmoniously supplemented with materials such as glass and ceramics. Because of its material properties, stainless steel can take on and reflect the colours of its environment. Stainless steel products can easily be integrated into almost any room. This material sets standards.

### Stainless steel with InoxPlus refinement

With Franke's InoxPlus surface coating the already easy to clean stainless steel has been approved once more. And so, annoying finger prints which previously often adhered stubbornly to stainless steel now belong practically in the past.

This is a technology where nano particles interlock with the molecules on the metal surface and thus nestle closely against microscopic imperfections. The results are deep finished, easy to clean, fingerprint-resistant surfaces.

### MIRANIT

Sanitary equipment made of solid MIRANIT resin-bonded mineral material are eminently suitable for the modern and simulta-neously aesthetic design of washrooms in institutions. MIRANIT products made in the truest sense of the word in one piece without bond seams and joins stand out because of their excellent properties – a high level of stability and an elegant look and feel. The smooth, pore-free, hygienic, easy to clean gel coat surface also offers extremely high resistance.

### Toughened safety glass

Single glazed toughened safety glass is a material which, like stainless steel, is distinguished by its timeless character and its ability to be combined with other materials. Glass and stainless steel represent high quality and timeless elegance. You can no longer imagine modern room design without these two materials. Therefore, the deliberate combination of the two materials is particularly attractive.

In accordance with safety requirements in washrooms Franke only uses toughened safety glass.
