

VPH infrared panel heater

For stylish heating for modern living, there is no better solution than Victory's VPH panel heater for those areas demanding discreet heating without any light.

VPH panel heaters emit longwave infrared, which creates warmth, without any light. Perfect for discreet, on-demand heating and ideal for offices, restaurants, bars, reception areas, or at home - anywhere where unintrusive heating is needed.

Discreet controllable heat

- Warmth without light
- Remote control
- Dimmable

VPH heaters include a remote control on/off/3-stage dimmer (Low/Medium/High). They are finished in an attractive, modern natural anodised finish and are fitted with a 3m long silicone HO5SS-F mains supply cable and supplied with wall/ceiling brackets.

Typical Applications

- Restaurants
- Bars
- Offices
- Waiting Rooms
- Hospitals & Surgeries
- Reception areas
- Beauty Salons
- Theatres
- Photographic studios
- Boardrooms
- Home
